

VewBox Recording Capacity Chart

SD Card	Files	Mins/File	Total Mins	Hours Mins *
2GB*	33	3	99	1hr 39mins
4GB	66	3	198	3hr 18mins
16GB	264	3	792	13hrs 12mins
32GB	528	3	1584	26hrs 24mins

Notes:

Only use recommended SD cards (Transcend® and Sandisk®)

2GB card supplied with **VewBox** has embedded PC Viewer software and the file storage structure.

This card must be used to load these onto User PC/Laptop. Other cards may then be used for recording and viewing. VewBox will record to the new card in a format that the Viewer software will recognise

Event Recording = 20 seconds pre-alarm and 30 seconds post-alarm

A normal recording file is 3 minutes in duration

* The accuracy of these storage capacity figures is subject to viewing conditions.

A 'busy' scene will require higher storage capacity.
